

Exploring the Creativity Paradigm Shift:

The serious and difficult Anthropocene challenges enmeshed in complexity, uncertainty, conflict, and impending unknowns, cannot be resolved through our obsessions with big data, artificial intelligence and hyper-specialisation. How might the creative arts provide us with clues as to what might work better in all domains?

1. Introduce each other 4X1m = 4m
 2. Each person in turn offers an initial thought/reflection/observation with possible relevance to their field 4X 3m= 12 m
 3. Dialogue to clarify important questions, observations and feelings 10m
 4. Ready to feedback in plenary 4m
- Overall: 30m
